

# XML editing trials – Q3 2015

**GNB** team

## Purpose and scope 2

#### Purpose

- Describe the various trials run in Q3 2015
- Present the limitations and issues encountered
- Assess workable solutions for simple documents

#### Scope

- XML editing in DitaExchange
- FM to XML conversion using SPEC2DITA

## XML editing trials

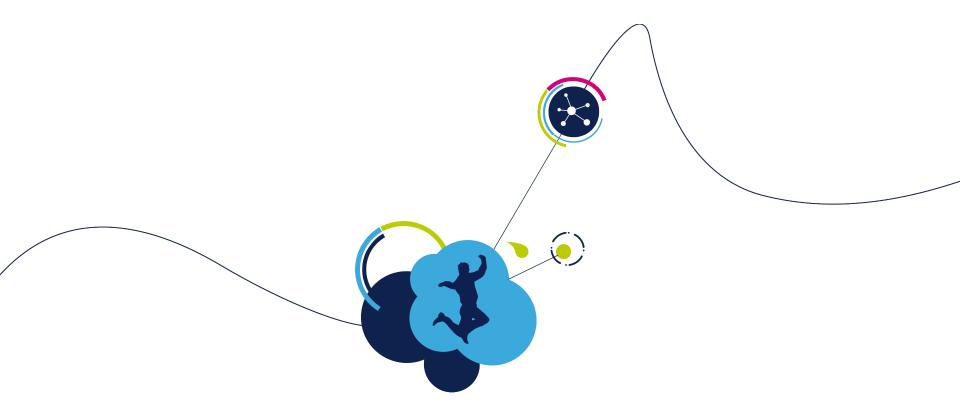

- Software license agreements (SLA)
- FM to XML conversion using SPEC2DITA
- Template for UM, AN, RN and TN
- Map download for local editing

### References 4

- XML editing user guide <u>LINK</u>
- OLM guidelines for SLA (Webinar) <u>LINK</u>
- XML editing SPEC2DITA steps <u>LINK</u>
- SLA template <u>LINK</u>
- Template for UM, TN, AN, RN LINK
- Template for ES LINK

# Trial 1 – Software License Agreement (SLA)

## Trail 1 – Software License Agreement

#### Trial description

- Follow OLM recommendations
  - clone the SLA template map and related topics
- Modify the SLA topic
  - replace the "standard" text with the one provided by MMS for MMY and MCD
- Publish the map in MSWord
- Rework the MSWord and generate the PDF
- Upload the PDF and SLA XML topic in DMS@ST

#### Limitations

- Huge difference between MMS SLA versus the "standard" SLA
- Format and requirements not yet fully defined for MMS SLA
- Latest style sheet version (v24) not adequate for SLA
  - Wrong headers
  - Blank page after the revision history

### Trial 1 – SLA editing limitation examples

ST technical literature

#### **Revision history**

Table 1: Document revision history

Date	Version	Changes

#### RESTRICTIONS.¶

Unless-otherwise-explicitly-stated-in-this-Agreement, You-may-not-sell, -assign, -sublicense, -lease, -rent-or-otherwise-distribute-the-Licensed-Software-for-commercial-purposes, -in-whole-or-in-part. You-acknowledge-and-agree-that-any-use, -adaptation-translation-or-transcription-of-the-Licensed-Software-or-any-portion-or-derivative-thereof--for-use-with-(i)-product-that-does-not-include-ST-Device-and/or-(ii)-with-

# Trial 2 – FM to XML conversion using SPEC2DITA

# Trial 2 – FM to XML conversion using SPE2DITA

#### Trial description

- Follow OLM guidelines to prepare the FM content
- Move the mif files and book to the Input folder
- Run SPEC2DITA
- Retrieve the map, topics and figures in the Output folder
- Edit the XML content in Oxygen XML Author
- Upload the ZIP of the converted document into DITAX

#### Limitations

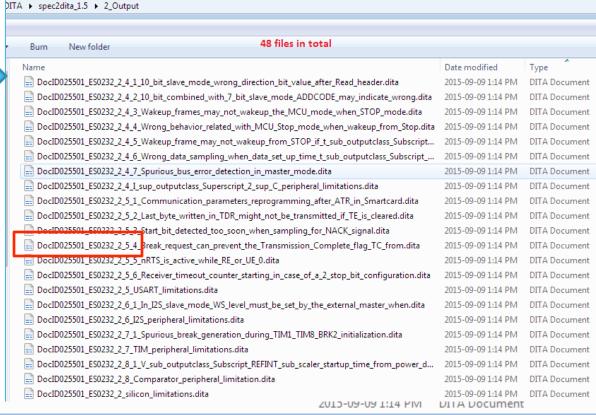

- Naming of the converted content not compliant with OLM recommendations
  - · Document name and section number included in topic or map name
  - Not sure how to proceed with map and topics renaming as per OLM recommendations
    - <M for map, T for topic>MMS<DDMMYYYY><HHMM><editor's initials>
- Cannot open the map with Oxygen XML Author
- Huge number of topics + 2 files for each figure (SVG and EMF)

# Trial 2 – FM to XML conversion using SPEC2DIAT limitations

#### Naming issue!

# Trial 3 – Template for UM, AN, RN and TN

### Trial 3 – Template for UM, AN, RN and TN

#### Trial description

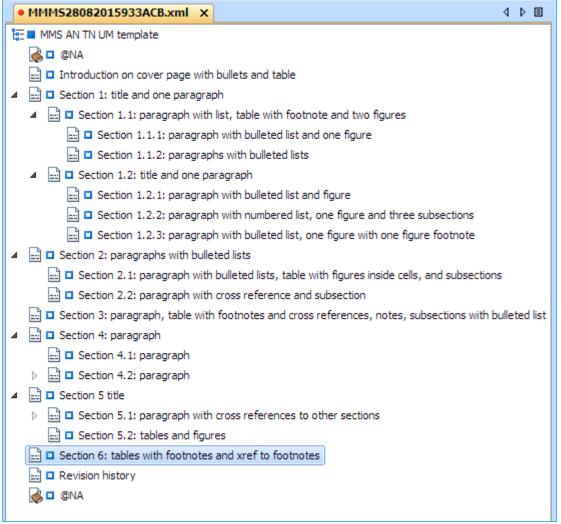

- Select an existing valid map
- Use the Clone Map functionality in DITA Exchange
- Rename the cloned map and topics
- Rework the content: rename the sections of interest as template
- Delete the topics of no interest in the map
- Publish the map in MSWord
- Generate a PDF

#### Limitations

- Cannot delete the cloned topics in DITA Exchange
- Timing issue with connection to DITA Exchange
- Tedious way of working with figures in DITA Exchange

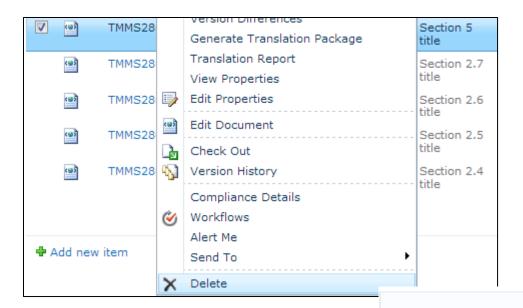

### Trial 3 – Template for UM, AN, RN and TN

How to use the template: each section includes some examples of XML content that can be copied into new topics in Oxygen XML Author

# Trial 3 – Template for UM, TN, AN, RN - Limitations

#### Error

Topic cannot be deleted.

The Topic

"http://dita.st.com/dx/ditaexchange/Repository/Topics/TMMS280820151023A CB.xml" is referenced in other Topics or Maps.

Click the link below to see where the Topic is being used.

### Trial 3 – Limitations with DITA connection 15

# Trial 3 – Workaround for DITA connection limitation

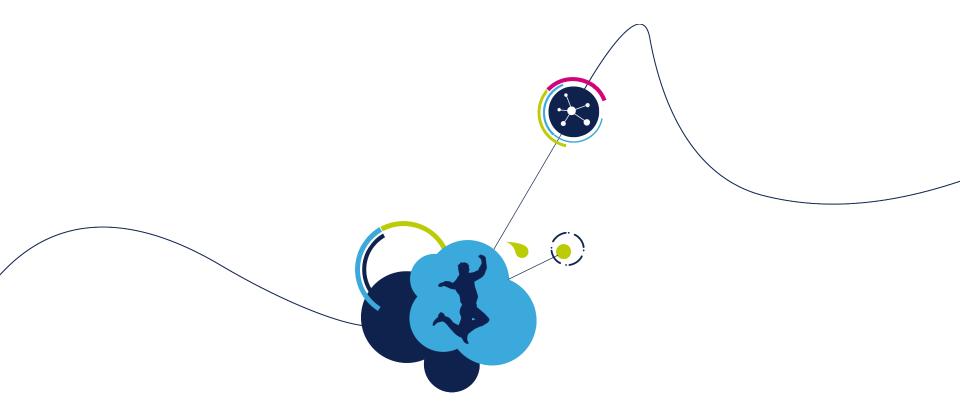

Tools>Preferences>Network connection settings>HTTP(S)/Webdav

# Trial 3 – Limitation with figures in DITA Exchange

- Very long sorting of figures in DITA Exchange
  - By Author
  - By title
- If using the Search to find figures, how to check out the figure once found as result from search?
- All kinds of naming in use: makes the sorting more tedious
  - G<Group name><DDMMYYYY><HHMM><Author's initials>.svg
  - MSv#####V#.svg
  - MS#####WV#.svg
  - <figure\_caption>.svg

# Trial 4 - Map download for local editing

### Trial 4 – Map download for local editing

#### Trial description

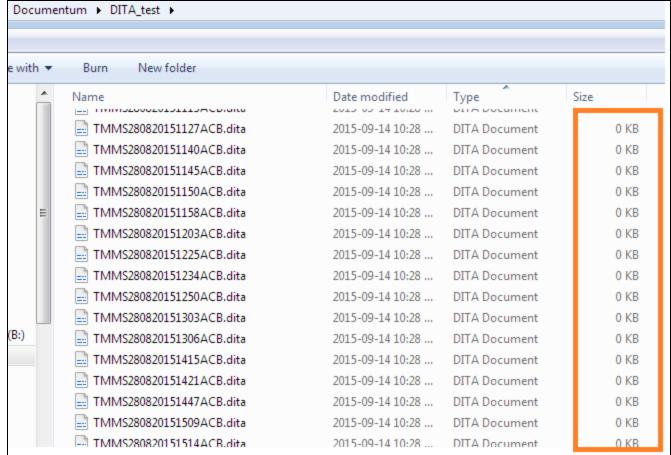

- Follow OLM recommendations
- Find the map of interest
- Select the Checkout and download map functionality in DITA Exchange
- Save the ZIP file locally
- Extract all files from the ZIP (map, submap(s),topics, figures)
- Edit the map and topics using Oxygen XML Author
- Create a ZIP of the edited content
- Upload the ZIP in DITA Exchange

#### Limitations

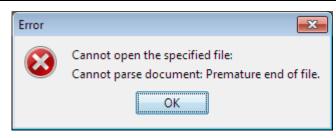

Cannot open the map stored locally with Oxygen XML Author

# Trial 4 – Map download for local editing

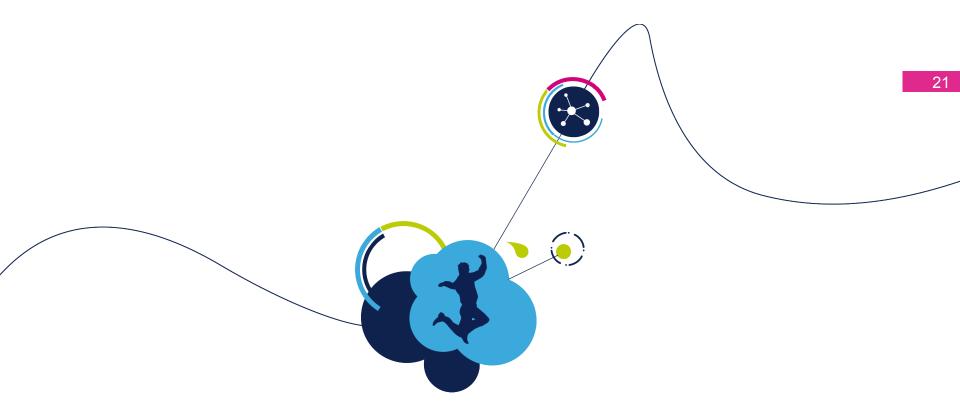

All the DITA documents and figures are empty !!!!

Error message when attempting to open the map with Oxygen XML Author

# Way forward

## Way forward 22

#### Current limitations

- Figure handling in DITA Exchange
- Result of SPEC2DITA conversion not editable in Oxygen
- Local download of DITA content not editable in Oxygen

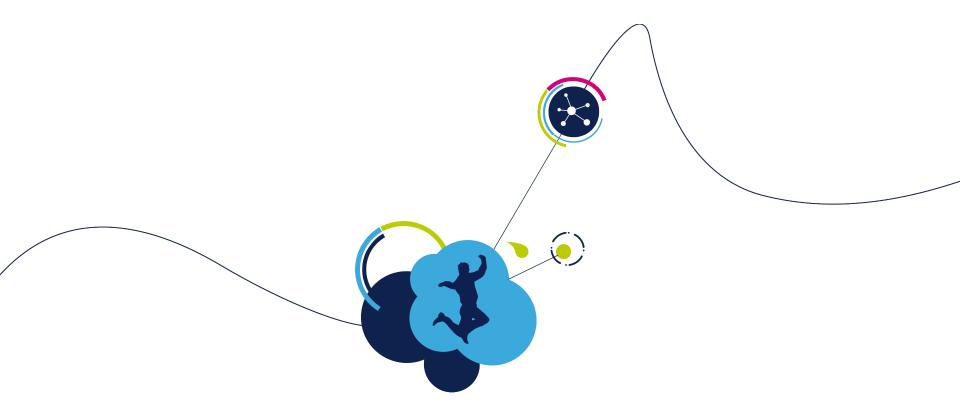

#### Possible solution

- Stick to OLM recommendations for map, topic and figure naming
  - <T for topic, M for map, G for graphic><Group><DATE><TIME><author's initial>
- Use templates available in DITA Exchange
- Use the Save to URL functionality for map in Oxygen
- Create new topics
- Copy/paste content directly from FM
- Use the available topics in templates to copy specific formatting

#### Applicability of possible solution

Small documents like RN, AN, ES, TN, etc.

# Thank you!
